- MongoDB
- SQL
- PL/SQL

Professional Experience

Software Developer <i>PolicyBoss</i>	05/2023 – present Mumbai, India
• Developed and managed user registration and admin processes, improving • Integrated term insurance plans by calling insurer APIs, displaying plans, and managing add-ons and riders. • Designed and implemented backend logic to process user data, fetch customized insurance plans, and handle success/fail responses, ensuring request accuracy • Stored user and insurance data securely in MongoDB, optimized front-end and back-end integration, which enhanced data retrieval speed by 15%	
Operation Executive <i>Infosys Limited</i>	08/2021 – 05/2023 Pune, India
• Led month-end close activities, ensuring on-time and accurate financial reporting, reducing reporting errors and enabling more data-driven decision-making for leadership. • Performed weekly and monthly tasks in Oracle Applications, streamlining data entry and reporting workflows.	

- **Developed** and optimized PL/SQL stored procedures, functions, and packages to automate data processing, cutting execution time and improving workflow efficiency.
- **Created** and implemented Oracle request sets, concurrent programs, and value sets to enhance system functionality and automate processes, reducing overall processing time.
- **Collaborated** with **cross-functional teams** to integrate Oracle Applications, reducing system downtime through proactive testing and coordination.

Associate

LinkInTime Pvt Ltd

01/2021 – 08/2021

Mumbai, India

- Prepared and delivered detailed operational and financial reports, including Inland letters, Interest Processing, IEPE, e-voting, and rejection data.
- Managed e-mailing and e-voting processes, streamlining workflows through automation and process improvements.

Projects

User Onboarding Management

This platform is an all-in-one solution developed to manage the complete lifecycle of user registration, document handling, training programs, payment processing, exam administration, and employee code generation. It is ideal for organizations that require a streamlined and integrated approach to onboarding and managing their workforce or participants.

Admin Dashboard

The system is built to handle various administrative tasks efficiently, ensuring that all user interactions, payments, and support requests are tracked, processed, and updated in real-time.

Term Insurance

Integrated term insurance plans by fetching data from insurer APIs, displaying available plans and their add-ons, collecting necessary customer information, and processing requests for personalized insurance options. Handled success/fail responses and ensured seamless user experience in selecting and purchasing insurance plans.
