

PRANAV JADHAV

QA Automation Engineer | Software Tester

Pune, Maharashtra | +91 9834485459 | pranav09j@gmail.com

PROFESSIONAL SUMMARY

QA Automation Engineer with 3.7+ years of combined manual and automation testing experience, including 2.5+ years dedicated to test automation. Hands-on with Selenium WebDriver (Java), Playwright (JavaScript), Cucumber BDD, TestNG, and Rest Assured for UI and API test automation. Experienced across functional, regression, sanity, integration, and end-to-end testing on web, mobile (Android/iOS), and cross-browser platforms. Skilled in API testing (Postman, Rest Assured), database validation (SQL), performance testing (Apache JMeter), and CI/CD pipeline integration (Jenkins, Git). Strong Agile/Scrum contributor with a track record of defect management in Jira and close collaboration with developers, BAs, and stakeholders to protect release quality.

CORE TECHNICAL SKILLS

Automation Testing: Selenium WebDriver (Java), Playwright (JavaScript), Cucumber BDD Framework, TestNG, Appium, Hybrid Automation Framework Design

API & Backend Testing: Rest Assured, Postman, REST API Testing, Webservice Testing, Request/Response & Auth Validation

Database Testing: SQL, Data Integrity Validation, Backend Transaction Testing

Performance Testing: Apache JMeter (Load, Response Time, Throughput, Concurrency, Stability Testing)

CI/CD & Version Control: Jenkins, Git, GitHub, Maven, Automated Regression Pipelines

Manual Testing: Test Case Design & Execution, Functional, Regression, Sanity, Smoke, Integration, UAT, End-to-End Testing

Cross-Platform Testing: Chrome, Firefox, Edge, Safari, Android, iOS, Tablet & Desktop Browsers

Tools & Practices: Jira, Eclipse, Agile/Scrum, Sprint Planning, Defect Tracking & Reporting, HTML, CSS

Operating Systems: Windows, Linux, macOS

PROFESSIONAL EXPERIENCE

Quality Analyst | *Neuro Spark Works Solutions Pvt. Ltd.*

Oct 2025 – June 2026

- Own end-to-end quality for assigned modules, combining manual test design with Selenium/Rest Assured automation for UI and API coverage.
- Integrate automated regression suites into CI/CD pipelines to accelerate build feedback and reduce manual regression effort.

Software Tester | *Sphere Info Solutions Pvt. Ltd.*

Apr 2025 – July 2025

- Executed functional and regression testing cycles, logged and tracked defects through resolution using Jira.

Automation Test Engineer | *CCS Infotech Pvt. Ltd.*

Nov 2023 – Apr 2025

- Built and maintained UI automation suites with Selenium WebDriver and Playwright, and API automation suites with Rest Assured, across multiple client projects (see Key Projects below).
- Designed and executed performance/load tests using Apache JMeter and validated backend data integrity via SQL.

Junior Tester | *Virtual SCM Pvt. Ltd.*

Aug 2022 – Oct 2023

- Performed manual functional, sanity, and regression testing; authored test cases from business requirements and tracked defects in Jira.

KEY PROJECTS

Zupe — Wellness Consultation Mobile App / Webapp

Environment: Selenium WebDriver, Rest Assured, Manual Testing, Jira, Chrome/Firefox/Edge, Android/iOS/Tablet

- Automated API test scripts with Rest Assured to validate request/response payloads, status codes, and authentication, reducing manual API regression effort.
- Developed and maintained UI automation scripts using Selenium WebDriver and Playwright.
- Executed automated regression suites to improve test coverage across releases.
- Performed sanity, regression, and cross-platform testing across desktop browsers, Android, iOS, and tablets.
- Designed and executed manual test cases for expert consultations, wellness services, and marketplace features; collaborated with developers and stakeholders to validate bug fixes.

Manashakti — Multi-Service Platform (Products, Subscriptions, Events)

Environment: Rest Assured, Postman, Apache JMeter, SQL, Jenkins/CI-CD, Jira, Selenium

- Automated API test scripts with Rest Assured to validate payloads, status codes, and authentication for platform APIs.
- Executed automated regression suites via Jenkins as part of the CI/CD pipeline for timely build-quality feedback.
- Designed and executed performance/load tests with Apache JMeter, evaluating response time, throughput, and concurrency.
- Performed database testing with SQL to validate data integrity and backend transactions.
- Validated payment, subscription, and event-registration workflows across web and mobile; conducted cross-browser and cross-device testing.
- Prepared test execution and quality metric reports for stakeholders; supported sprint planning and UAT.

Unnatti — End-to-End Personal Loan & Insurance Banking Platform

Environment: Rest Assured, SQL, Postman, Apache JMeter, Jira, Agile/Scrum

- Automated API test scripts with Rest Assured to validate request/response payloads, status codes, and authentication for loan-processing APIs.
- Designed and executed functional, integration, regression, and UAT test cases for eKYC, Bureau Check, Sanction, Disbursement, EMI Mandate, and Insurance workflows.
- Tested banking integrations including Digi-Locker e-KYC, Aadhaar/PAN Verification, Penny Drop Verification, e-Mandate, and UPI AutoPay.
- Performed database testing via SQL to validate loan, KYC, and disbursement data.
- Executed performance/load testing with Apache JMeter on critical APIs and insurance workflows; managed defects in Jira with Developers, BAs, and Product Owners.

EDUCATION

- Bachelor of Technology (B.Tech) — MIT Pune, 2017–2021 — CGPA 8.56/10
- 12th Standard (Science) — YCIS Satara, 2016–2017 — 91.85%

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi

Strengths: Fast learner on new tools/technologies, strong cross-team communicator, self-starter comfortable ramping up independently
